MIZY INFINITY NETWORK

DUAL-UTILITY BLOCKCHAIN PROTOCOL

Revolutionizing Energy & Water Infrastructure Transparency in Emerging Markets Through Decentralized Technology

FOUNDER

Nthabiseng Mahlatsi

LOCATION

Soweto, South Africa

STATUS

Validated Prototype

THE PROBLEM: Infrastructure Instability

01

ENERGY CRISIS

- → 600 million Africans lack reliable electricity access
- → Africa loses billions annually to load shedding
- → Municipal grids are unreliable and opaque
- → No real-time accountability mechanisms exist

WATER CRISIS

- → Water billing systems are opaque and inefficient
- → Municipal leakages result in massive revenue loss
- → Real-time accountability is nearly impossible
- → No transparent usage tracking infrastructure

600M	$2.5T	40%	0
Without Reliable Electricity	Global Infrastructure Gap	Water Lost to Leakages	Dual-Utility Blockchain Solutions

02

THE SOLUTION: MizyNexus Protocol

1

Sovereign Node Registry

Each household registered as a Sovereign Node with unique blockchain identity, immutable registration records, and self-sovereign utility identity.

2

Dual-Utility Accounting

Energy tracked in kilowatt-hours (kWh) and water tracked in liters — both utilities on a single transparent ledger with unified billing.

3

Event-Based Transparency

Every transaction emits immutable events, creating real-time audit trails for all stakeholders with public verification and zero-dispute billing.

"The protocol captures value through transaction-based fees while enabling transparent public utility accounting for the first time in emerging markets."

Market Opportunity

TAM - Global Utility Modernization

World Bank Infrastructure Investment Needs

$2.5T

SAM - Emerging Markets Digitization

Africa, Asia, Latin America Markets

$180B

SOM - Africa Blockchain Adoption (2027)

Target Addressable Market

$5B

Growth Roadmap

2026 Q1-Q2	Pilot: Soweto Township	10
2026 Q3-Q4	Scale: 3 Townships	50
2027	South Africa Expansion	100
2028	Pan-African Rollout	1K
2030	Multi-Continental	10K

04

Smart Contract Architecture

MizyNexus.sol

```
// SPDX-License-Identifier: MIT
pragma solidity ^0.8.20;

contract MizyNexus {
    struct SovereignNode {
        string nodeId;
        uint256 energyKwh;
        uint256 waterLiters;
        bool isActive;
        uint256 registrationTime;
    }
```

Contract Name	**MizyNexus.sol**
Language	**Solidity 0.8.20**
Status	**Validated Prototype**
Test Environment	**Remix VM (London)**
Target Chain	**BNB Smart Chain**

✓ 4+ Successful Transactions

100% Event Emission Success | 0 Critical Issues

Revenue Model

% **Transaction Fees**
1-3% fee on all utility payments

N **Node Onboarding**
One-time infrastructure registration fee

S **SaaS Dashboard**
Municipal analytics subscription

G **Governance Layer**
Future MIN token participation

Revenue Stream	Year 1 (10 Nodes)	Year 2 (50 Nodes)	Year 3 (100 Nodes)
Transaction Fees	$1,200	$12,000	$36,000
Node Onboarding	$5,000	$25,000	$50,000
SaaS Subscriptions	$2,400	$12,000	$24,000
Total Projected Revenue	**$8,600**	**$49,000**	**$110,000**

Competitive Advantage

Feature	Traditional Systems	MizyNexus Protocol
Transparency	Paper-based, opaque	**On-chain, immutable**
Audit Trail	Manual, error-prone	**Automated, event-based**
Dual-Utility	Separate systems	**Single integrated protocol**
Real-time Data	Delayed (days/weeks)	**Instant verification**
Scalability	Limited by bureaucracy	**Blockchain-native**

Infrastructure Expertise

Deep engineering knowledge of electrical and water systems

Municipal Integration

Complex regulatory navigation capabilities

Community Access

Rooted in Soweto with established local networks

Regulatory Navigation

Proven ability to work within African utility frameworks

Impact & ESG Metrics

🌱 Environmental

500
Tons CO2/Year Reduced

1.2
GWh Clean Energy

- ✓ Carbon footprint reduction tracking
- ✓ Clean energy monitoring
- ✓ Water conservation incentives

👥 Social

50+
Local Jobs Created

100
Families Empowered

- ✓ Local technician employment
- ✓ Reliable utilities for education
- ✓ Zero billing disputes

📊 Governance

100%
On-Chain Transparency

∞
Immutable Records

- ✓ Verifiable ESG data reporting
- ✓ Immutable transaction history
- ✓ Public audit accessibility

Team & Credentials

Nthabiseng Mahlatsi

Founder & CEO

- ✓ Red Seal Certified Electrical Engineer
- ✓ Blockchain & Web3 Developer
- ✓ Deep infrastructure expertise
- ✓ Based in Soweto, South Africa

"Infrastructure transparency is not optional — it's essential for economic development. Mizy Infinity Network modernizes public utilities through decentralized transparency, enabling infrastructure-backed digital economies."
